

VISTA

PHARMACY SHELVING

Smooth Slide and Tilt action provides easy access to all products – with no loss of wall bay space.

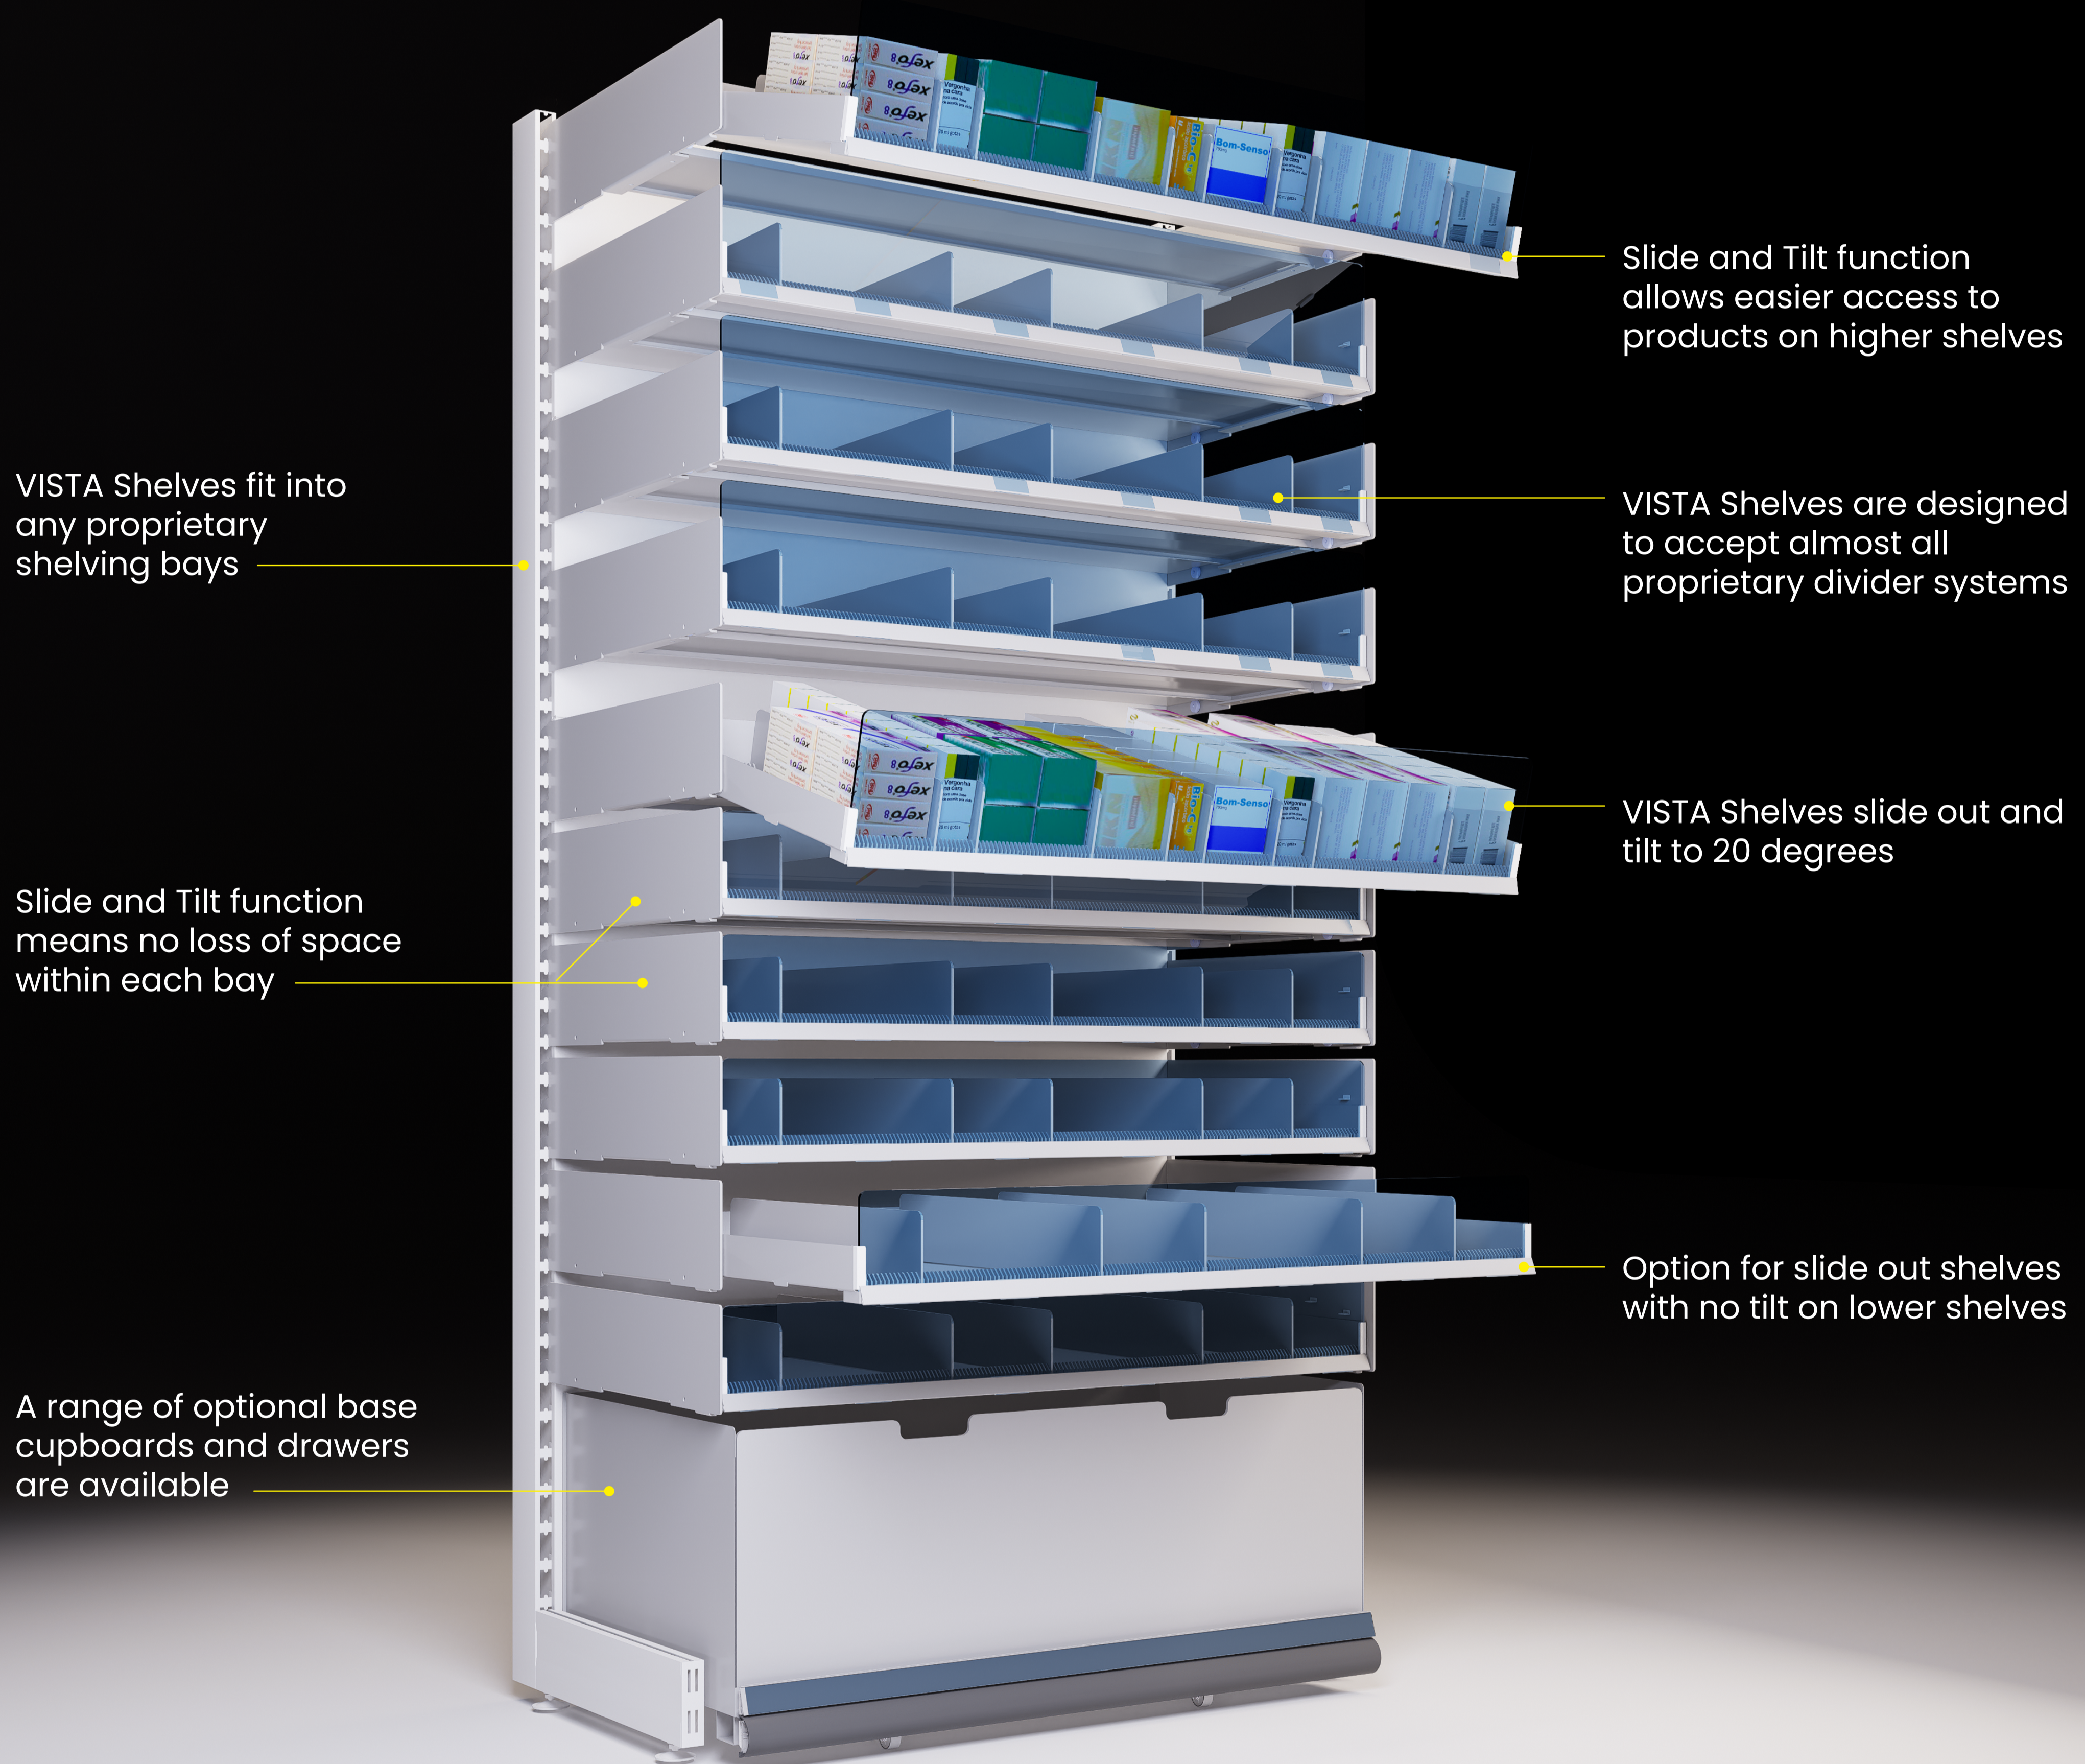

The Vista Shelf is a pull-out tray (that also tilts if required) to allow improved access to your products... for stock rotation, counting and re-merchandising.

Fabricated from mild steel, the lightweight Vista shelf is very strong and can be made to any size and colour – and amazingly, it will fit into any existing shelving bay – including chiller units!

When products require it, the Vista Shelf can be supplied with any proprietary pusher system ... whilst still providing the benefits of easier stock rotation and counting.

The simple two-part construction operates freely – without the need for runners or springs, making it robust and long lasting – and with practically no maintenance!

VISTA SHELF SYSTEM FEATURES

VISTA Shelves fit into any proprietary shelving bays

Slide and Tilt function means no loss of space within each bay

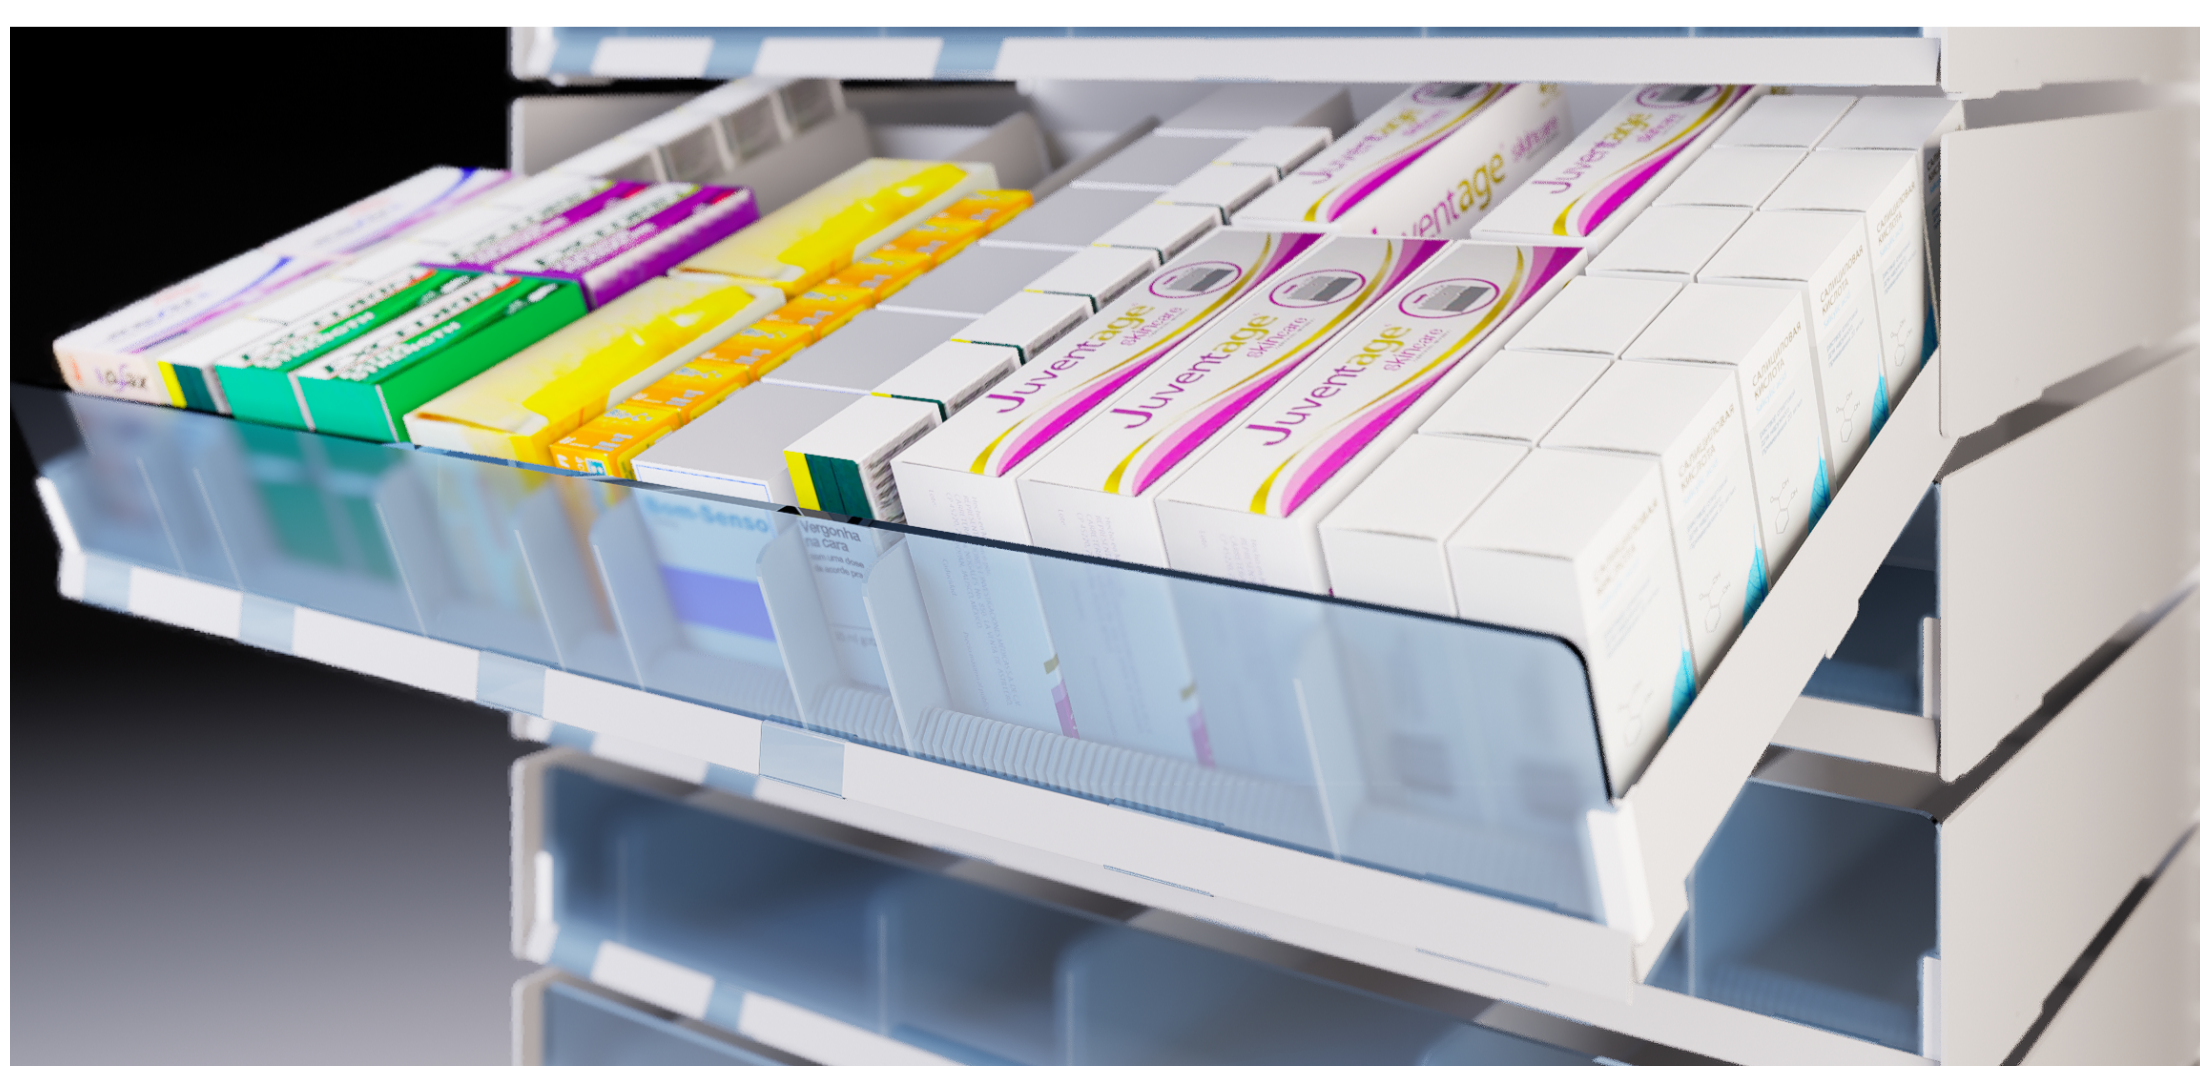

A range of optional base cupboards and drawers are available

Slide and Tilt function allows easier access to products on higher shelves

VISTA Shelves are designed to accept almost all proprietary divider systems

VISTA Shelves slide out and tilt to 20 degrees

Option for slide out shelves with no tilt on lower shelves

KEY BENEFITS

- Slides out and tilts to allow easy visibility of stock
- Reduces merchandising and stock taking time
- Easy to fit – requires no tools
- Adaptable – fits to all store wall bay systems
- Flexible – adjustable to fit most bottle sizes
- Additional promotional opportunities via front riser
- Strong design – all steel construction reduces maintenance

The Vista Shelf is a proven and tested product; and has in fact been used by retailers – in various formats – for over 10 years.
